DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 11-26, drawn to a method of treating leukemia with cytarabine and a compound of general formula I, classified in class 514, subclass 274.
- II. Claims 27-50, drawn to compositions and combinations of cytarabine and a compound of general formula I, classified in class 514, subclass 274.

The inventions are distinct, each from the other because of the following reasons:

Groups I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h).

In the instant case, the composition as recited in the claims of Group II can be used in a materially different process than that claimed in the methods of Group I. For example, a composition of cytarabine and β -L-OddC could be used to treat Non-Hodgkin's lymphoma or as an antiviral.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Election of Species Requirement for Either of Groups I or II

Claims 11-20, 23-24, 27-33, 38-41, and 46-49 are generic to the following disclosed patentably distinct species: the genus of compounds represented by general formula (I) as recited in Claim 11. The species are independent or distinct because to search the entire genus of compounds would present an undue search burden on the Examiner. For example, the following compounds would be encompassed by general formula (I) as recited in the instant claims:

**A****B**

Because of their structural diversity and lack of a common core, the search for Compound A would not result in identification of Compound B and *vice versa*. Thus, for purposes of examination, applicant is required under 35 U.S.C. 121 to elect a single disclosed species of Formula (I), even though this requirement is traversed.

Proper response to this election of species requirement requires that Applicant elect: A) a single disclosed compound of general formula (I) by defining the R and B substituents of said compound; and B) a single biological response modifier from the group recited in Claim 18 (or Claim 33, if applicable to elected Group).

Art Unit: 1614

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the

Art Unit: 1614

record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Joint Inventors

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
